MODULE 77

[RE]THINK THE MODULAR

Design: Danilo Olim by DAAO 2017

The 77 is a module that combines and multiplies itself for endless structure possibilities.

The act of constructing the piece, creates a deeper sense of ownership, promoting creativity and invention. The pieces are inserted in each other, facing either forward or backwards.

The 77 is a small piece, that can go unnoticed when isolated, highly gains in terms of structural resistance and formal output, when grouped. One storage and shelving module that combines and multiplies itself for endless structure possibilities.

The structure of 77 is perfectly adaptable to the changing needs that current families have and the different spaces that people come to inhabit during their lifetime. Any user can assemble, transform, create and recreate an endless number of shapes and sizes

THE CONCEPT

A structural efficiency is attained with this piece, sprung from a familiar natural pattern. This hexagonal pattern is constituted by grouping the same shape over a plane, potentially filling the entire surface, without intervals

ASSEMBLY PROCESS

Module 77 is extremely easy assembly process
